### SOLUTIONS FOR ALWAYS-ON MOBILE CONNECTIVITY

Today's handheld and portable devices are smaller, lighter and have more performance requirements than ever before. TE Connectivity (TE) has a broad range of space-saving, high-performance interconnects that can help you meet the unique engineering challenges of always-on, data hungry mobile devices.

From antennas and memory cards to EMI shields and battery connectors, we can help you create a solution that meets the design specifications for your device in a data driven world.

## INTERNAL INTERCONNECTS

Reliable interconnects designed for today's miniaturized market.

### Flexible Printed Circuit (FPC)

Space-saving, angled insertion connectors that can be placed in a wide range of locations on a PCB.

### Compressive Board-to-Board (BTB)

Low-cost power and signal solutions in a small form factor.

### Fine Pitch Board-to-Board (BTB)

0.4 mm pitch plus new shielded board-to-FPC solutions for smaller, thinner applications.

### M.2 Next Generation Form Factor (NGFF)

Save more than 20% of PCB real estate compared to the PCIe Mini Card.

## INPUT/OUTPUT (I/O)

Cables assemblies and connections designed for reliable, long-term use within a range of devices.

### USB Cables

Standard cables and customized solutions for a range of interface combinations.

### IP68 & Micro USB

IP68 rated micro USB ports for resilient devices.

### Audio Visual (AV) Jack

A range of reliable circular I/O connectors available in SMD or compressive mounting styles.

## ANTENNAS

Standard and custom high-performance antennas for operation on most networks in regional or international markets.

### Standard Embedded Antennas

A range of products supporting low profile wireless connectivity for 4G and 5GHz WiFi applications.

### Custom Antennas

TE can help integrate wireless connectivity into other device assemblies to help save valuable space in slim devices.

## SHIELDING AND GROUNDING

Limit interference with customizable shields and contacts for complex devices.

### Board Level Shielding (BLS)

EMI shields that minimize crosstalk in complex devices without affecting system speed.

### Spring Fingers

Tiny, scalable, surface mountable contacts allow designers to fit grounding solutions almost anywhere.

## POWER

Low profile interconnects offer design flexibility with a number of positioning options.

### Battery Connectors

Balance current carrying capabilities, ensure higher amps, and support fast charging times with a range of solutions.

## RADIO FREQUENCY (RF) CONNECTORS

Effective, low-cost switching connectors enable hands-free operation of mobile devices.

### Switching Coax

High force contacts increase connection reliability in a range of low-profile products.

## MEMORY CARD CONNECTORS

A range of card connector sizes and broad design freedom allows designers to find the best product for their specific need.

### SIM/SD

Large array of options including block, tray, and combo connectors.

## CIRCUIT PROTECTION

Protect and keep your device running longer with power and Electrostatic Discharge (ESD) protection.

## SENSORS

Compact, reliable sensors can help monitor a device's long term, easy operation.
